WORK EXPERIENCE

Production Technician

Bio Rad Laboratories | Jan 2021 - Present

I work on the assembly of Polymerase Chain Reaction (PCR) devices, quality assurance checks, and helped with refining the assembly procedure to help with clarity and understandability.

This has gave me experience in the process for the manufacture high quality biomedical devices that meet the standards and regulations for audits.

Dental Assistant

SingHealth Polyclinics | Sept 2019 - Dec 2019

I helped the Dental Officer with the dentistry tasks such as endodontic and prosthodontic procedures, dental radiography, handling dental equipment, maintaining cleanliness and sterility of dental equipment, educating clients on dental and post-operative care.

This has gave me experience in the usage of biomedical dental equipment, dental biology, healthcare regulations, infection control and patient care and interaction.

Intern

Medtronic International Limited, Spinal and biologics | April 2015 - August 2015

I used the articulate software to build online modules to teach biomedical sales representatives about the spinal anatomy and spinal biomedical equipment. This is to help with the automation of biomedical equipment teaching.

This has gave me knowledge of spinal anatomy and spinal biomedical equipment, and the ability to understand and explain concepts efficiently.

EDUCATION

Singapore Polytechnic

Specialist Diploma in Biomedical Engineering | April 2021 - Present

University of Queensland

Degree in Biomedical Science | Feb 2018 - June 2019
Dropped out

Temasek Polytechnic

Diploma in Biomedical Engineering | April 2013 - May 2016
GPA: 2.46/4.0
